

The Unique Adventure of Rattax

Part 1

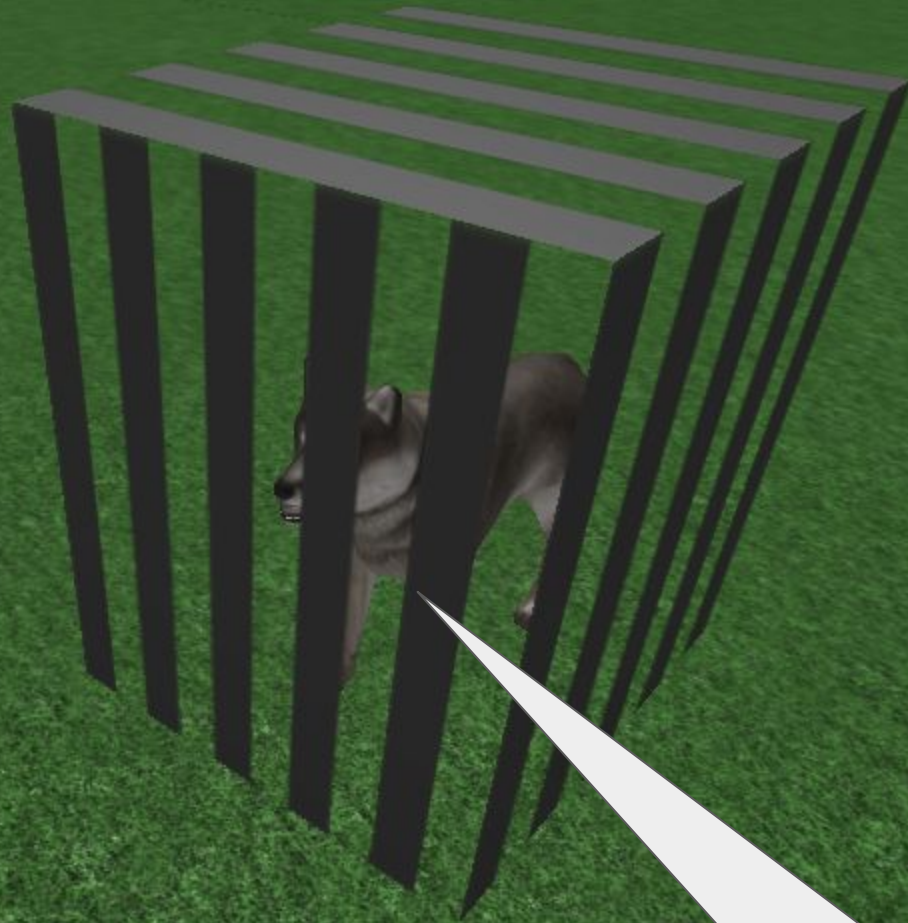

Hi. I'm just a normal wolf. I do wolf things.

HAHAHA! I'm an evil scientist. I am looking 4 a wolf 4 my evil fetish experiment.

Yay! I found one. I got you!

Oh no i've been caught.

Welcome to my lab. Get into my transformation machine.

Now i can bring my OC to life. By taking this boring wolf and turning him into the stuff on my computer. Here, have a read.

RATTAX TRAITS

Normal Rattax Traits:

- stuck up.
- sarcastic.
- colourful.
- loves role-playing with her friends.
- loves playing Roblox and Minecraft.
- has a fetish for fingering her own asshole.
- Has a giant clone that defends her.

Giant Rattax Traits.

- does what rattax says.
- has stomach acid with a ph level of 0.

TOTALLY KEWL EPIK COMPUTER COMPANY

See. My plan is to create a character with these traits to see what they do in the wild. You'll see that i did not directly give a home trait. So i would like to see where these animals decide to live together.

The wild, by the way, is actually a planet far away from here that is a wolf fantasy island utopia. My plan is to monitor then closely. To see if Rattax fits in. Because if she doesn't, she will have her clone destroy the world. Hopefully.

When i press the launch button the machine will make the wolf become my oc and launch her and her giant clone up into space to land on Wolf World. I will be going too so i can observe everything up close.

Now i'm going through space.
When we land on the planet the
wolf and the giant clone will be
created. Ahahahahahaha!!!

Now we've landed on the planet. I have chosen to land a few miles away from the other wolves. This is so Rattax can find a home out here. Anyway i'm going into observer mode. So you won't see me in the next episode cuzz i will be hidden

That's all fuckas! Stay tuned
4 the next episode.
